

Molded Fiber Glass Companies Composite Manufacturing for Wind Energy

Building Wind Blades, Nacelles and Spinners for 24 years

Molded Fiber Glass Companies
A Distinguished International Composites Company

MFG Value

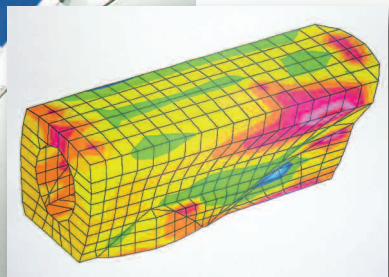

**Expertise, Capacity, and Agility
to Meet Your Manufacturing Needs**

MFG Research

MFG Research is the largest and best-equipped laboratory in the composite processing industry and provides unmatched expertise in materials testing, material selection, and process development along with the ability to rigorously test and verify product integrity. MFG Research is certified via A2LA as an accredited laboratory per ISO/IEC 17025, which includes 40 testing accreditations.

MFG Design Center

MFG has a dedicated Design Center that provides various levels of engineering support as a value-added resource to customers through each of the MFG entities. The center supports both new product designs and design revision/updates with detailed design analysis, and proposes design recommendations for improved ease of manufacturability.

Committed to Wind Energy Excellence

MFG is proud to be a part of the dynamic and exciting wind energy industry. Whatever size program you are involved with, we invite you to contact us today to discuss ways we might work together.

MFG is an active member of these important industry associations.
